COMMUNITY LIFE

Rotaract Esprit Club

📅 2018-Now   📍 Tunis,Tunisia

- Led major projects and held significant responsibilities as a founder member, contributing to the growth and positive impact of the organization.

ACADEMIC PROJECTS

Development of a MERN Stack web application

🗓 January 2022 – June 2022   📍 Esprit

- Led the creation of a groundbreaking web application that disrupts traditional e-commerce models. The application employs advanced techniques to identify, interpret, and analyze consumer emotions based on Amazon reviews. Furthermore, it offers real-time delivery tracking functionality, allowing users to monitor their orders with ease and convenience. Leveraging the power of a chatbot for virtual assistance, the application ensures seamless support and enhances user engagement throughout the shopping journey.
- **Technologies and languages: MongoDB,ExpressJS,ReactJS,NodeJS,Flask,Git**

Development of a FullStack web application

🗓 October 2021 – January 2022   📍 Esprit

- Developed an online store with a primary focus on connecting sellers and buyers. Developed a robust logistics service that ensures smooth shipping and timely delivery of orders. Implemented efficient systems and processes to streamline the buying and selling experience. Leveraged industry knowledge to optimize inventory management, shipping logistics, and order fulfillment, resulting in a seamless end-to-end process.
- **Technologies and languages: : SpringBoot,Angular,MySQL,Git**

Development of a Desktop application

🗓 February 2020 – Mai 2020   📍 Esprit

- Developed a desktop application for efficient farm management, providing the farm owner and selected employees access to their respective sections. The application serves as a reliable and user-friendly tool, optimizing time and increasing farm revenue. It offers comprehensive features such as medication, food, and animal management, as well as invoicing for better daily tracking. By providing regular stock monitoring, the application helps prolong equipment lifespan
- **Technologies and languages: : C++,Qt,Oracle,Git**

ASCNS Tennis Club

🗓 2010-2016   📍 Tunis,Tunisia

- Tennis player
